

KRISHNA GUPTA

Generative AI Engineer

+91 93518 77084 • Krishna0211gupta@gmail.com • linkedin.com/in/Krisnag02 • Gurugram, India

PROFESSIONAL SUMMARY

Generative AI Engineer with hands-on experience building LLM-powered applications and AI workflows using Large Language Models (LLMs), HuggingFace Transformers, and Python. Currently at TCS, developing scalable AI pipelines for enterprise AI integration and analytics. Expanding expertise in LangChain, RAG architectures, OpenAI APIs, LlamaIndex, vector databases, prompt engineering, and inference optimization to design and deploy cross-functional AI solutions that deliver measurable business value.

TECHNICAL SKILLS

Generative AI: LangChain, LlamaIndex, OpenAI API, HuggingFace Transformers, Prompt Engineering, RAG Architecture, Embeddings, AI Workflows.

ML & Deep Learning: Scikit-learn, TensorFlow, PyTorch, CNNs, RNNs, NLP, Predictive Modeling, Model Fine-tuning, Model Deployment

Programming: Python (NumPy, Pandas, Matplotlib), SQL, Git, Linux

Cloud & DevOps: AWS / GCP (basics), Docker, CI/CD Pipelines

Visualization & Tools: Power BI, Tableau, ServiceNow, Agile

EXPERIENCE

Assistant System Engineer | **Tata Consultancy Services, Gurugram** *May 2024 – Present*

- Built scalable AI pipelines for infrastructure data collection and incident analysis using Python and SQL, significantly reducing manual effort and enabling faster resolution cycles.
- Developed NLP-based text processing scripts to extract insights from incident logs in ServiceNow, reducing recurring issues through trend identification and inference optimization.
- Collaborated cross-functionally with infrastructure and operations teams to deliver enterprise AI integration solutions, designing automated reports to surface actionable KPIs.

Data Analyst Intern | **HighRadius (Remote)** *Jan 2023 – Apr 2023*

- Designed dashboards to track website performance and engagement KPIs, considerably enhancing client visibility and data accessibility.
- Conducted EDA on customer behavior datasets, uncovering patterns that improved business decision-making and product strategy.
- Collaborated cross-functionally with product and engineering teams to build analytical prototypes, streamlining requirement gathering and accelerating delivery cycles.

PROJECTS

- Multi-Document RAG Chatbot (GenAI)** — Built a multi-document RAG chatbot using LangChain, ChromaDB, and OpenAI API supporting semantic search, context-aware Q&A, and source attribution across custom PDF corpora. Implemented PDF chunking, embedding generation, vector storage, and multi-turn conversation memory via Streamlit UI.
- LLM-Powered IT Incident Summarizer (GenAI)** — Developed an LLM-powered IT incident summarizer using LangChain and OpenAI API with few-shot prompt engineering, automating root cause analysis and structured summary generation from raw incident logs. Reduced manual triage effort significantly by extracting severity, affected systems, and resolution suggestions as structured JSON output.
- Text Paraphrasing Tool (NLP / HuggingFace)** — Developed an NLP-based paraphrasing tool using HuggingFace Transformers (T5/BART models), implementing fine-tuning techniques to maintain semantic consistency. Applied embeddings and transformer architecture for high-quality output.
- Image Classification with CNNs (Deep Learning)** — Designed and trained a CNN model in TensorFlow/Keras on the CIFAR-10 dataset, achieving high classification accuracy through hyperparameter tuning and data augmentation techniques.

- **Stock Market Prediction (ML)** — Built a predictive model using Python and Scikit-learn to forecast short-term stock price trends, incorporating feature engineering and cross-validation for model robustness.
- **Interactive BI Dashboard (Power BI)** — Built a Power BI dashboard visualizing sales KPIs and business metrics, enabling executives to make real-time data-driven decisions across departments.

EDUCATION

B.Tech, Computer Science Engineering | **Chandigarh University, Mohali** *May 2023*
Intermediate (Science) | **L.A.S.E.A, Jhalawar** *May 2019*

CERTIFICATIONS

- Microsoft Certified: Azure AI Engineer Associate (AI-102)
- Microsoft Certified: Azure AI Fundamentals (AI-900)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Generative AI – Udemy (2025)
- Python & Data Structures – Udemy (2025)
- Foundations of Data Analysis – Future Skills Prime (2023)
- SQL (Intermediate) – HackerRank (2023)
- Software Engineer – HackerRank (2023)

AWARDS

- On the Spot Award – Tata Consultancy Services (*3)
- Elevate Wings Award – Talent Development, TCS
